Vision health resource calendar

See the year bright and clear

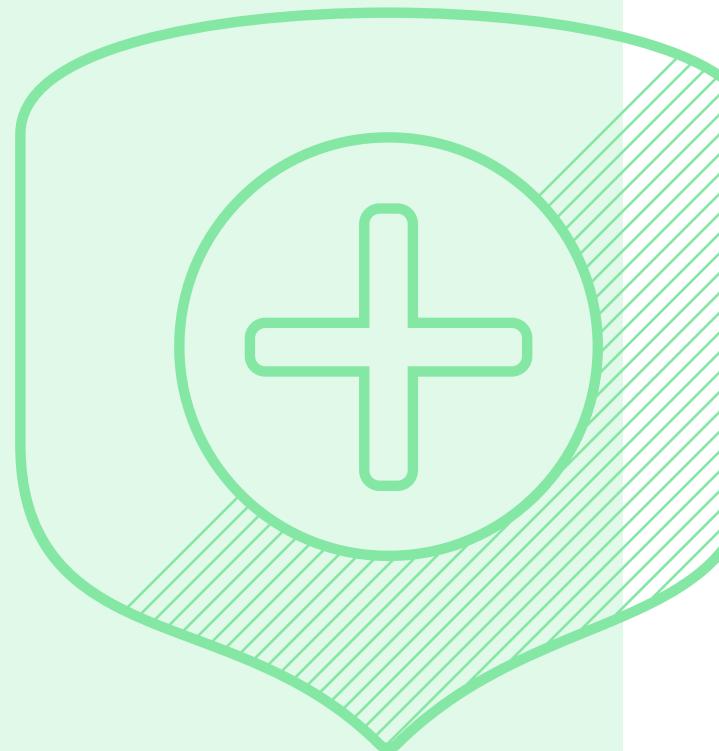

This is more than a calendar

It's a resource library of preventive care and reminders for your employees. Use these articles, interactive features and tools to promote vision health throughout the year.

Copy and paste intros and links into a newsletter, email, intranet or your format of choice.

This document includes interactive elements and is best viewed in Adobe Acrobat or Reader.

January

National Glaucoma Awareness Month

Make a Date for Your Eyes: Your Annual Exam

Getting your eyes checked can help you be the vision of health.

You may think you need an eye exam only when it's time to update your eyewear prescription. But the truth is, eye exams are about a lot more than seeing whether you need a new pair of glasses or contacts. Comprehensive eye exams play an important role in your overall wellness, and you should get one every year for optimal vision health. Besides measuring your vision, regular eye exams can help identify early signs of certain chronic health conditions, including high blood pressure, diabetes, heart disease and high cholesterol.¹

Understanding your benefits

A guide for member resources

EyeMed tools and resources make the vision benefit experience easy, from finding your Member ID to scheduling your next eye exam.

WELCOME KIT WITH MEMBER ID CARDS

Communication starts with your EyeMed Welcome Kit. This information kit contains everything you need to get started, including:

- Two ID Cards – one for you and one for a dependent. The ID Card is where you will locate your Member ID.
- A complete listing of the vision services and materials covered by your plan.
- A list of in-network providers nearest to you.

Are you at risk for glaucoma?

Glaucoma is the name for a group of eye diseases that develop when increased fluid pressure in the eyes damages the nerve fibers in the optic nerve and retina. This damage can lead to irreversible vision loss.

The good news is if glaucoma is detected and treated early, its progression can be slowed or stopped. But the bad news is that people with glaucoma don't always show symptoms. That's why it's important to know if you're at risk.

According to Prevent Blindness America, it's estimated that over 4 million Americans have glaucoma, but only half know they have it. Anyone can get glaucoma, but if you fall into one or more of the risk categories listed below, it's particularly important to receive a comprehensive eye exam that includes dilating your pupils every year:

Make a date for your eyes: Your annual exam

Eye exams are not just for updating prescriptions for glasses and contacts – they can tell us a lot about our overall health.

Understanding your benefits

Start the year off by having a solid understanding of your vision benefits. Check out this interactive tool that makes the vision benefit experience easy, from finding your Member ID to scheduling your next eye exam.

Are you at risk for glaucoma?

January is Glaucoma Awareness Month. The good news? If glaucoma is detected and treated early, its progression can be slowed or stopped. That's why it's important to know if you're at risk.

February

Age-related Macular Degeneration | Low Vision Awareness Month

Need Help Finding the Right Eye Doctor for You?

Tips for choosing whom to trust with your eyes.

If you ask people what's the most important of their five senses, chances are they'll say their eyesight. It's no surprise, considering we rely on our vision for almost every activity we perform. That's why choosing someone you trust to care for your eyes is an important decision—but it doesn't have to be a difficult one.

Choosing someone you trust to care for your eyes is an important decision—but it doesn't have to be a difficult one.

Need help finding the right eye doctor for you?

Finding the right eye doctor can help you protect your eyes and vision. By doing your homework, you are sure to find one to help you take good care of the sense you value most – your vision.

Low Vision: At a glance

In honor of February being Low Vision Awareness Month, let's dig deeper into what Low Vision means, what causes it and how to manage it.

All about age-related macular degeneration

Take a closer look at detecting and preventing a condition that affects millions of Americans aged 40 or older.

March

Workplace Eye Wellness Month

March 12: World Glaucoma Day
March 23: World Optometry Day
March 30: National Doctor's Day

Eye exams & your eye doctor

Annual eye exams are key for maintaining good eye health. They enable your doctor to monitor the health of your eyes and track changes that can occur from year to year.¹ For example, subtle changes in the retina can be a warning sign of high blood pressure.²

Eye exams and your eye doctor

March is Workplace Eye Wellness Month, so let's learn all about the importance of annual eye exams and why they are key to maintaining good eye health.

4 questions to ask your child's eye doctor

There is a strong link between vision and learning, yet many vision conditions in children go un-diagnosed. As a parent, you might not know what to expect during your child's visit, so here are a few questions you can ask the provider while you're there.

Video: Importance of eye exams

Hear from Optometrist Dr. Bradley Powers about why a comprehensive eye exam isn't just for getting an updated prescription – but a critical part of preventative care.

April

Women's Eye Health and Safety Month | Sports Eye Safety Month | Presbyopia Awareness Month

All eyes on women's health

As we spend more time this month focusing on the incredible strengths and influence women bring to our local, national and global community, it's also a great time to become more familiar with some of the vision-related health concerns women face.

Look through the lens of common eye conditions

A screenshot of an eye condition simulator. It shows a split-screen image of the Statue of Liberty. The left side is clear, while the right side is blurred, representing a visual impairment. A circular cursor is positioned in the center. To the right of the image is a green sidebar with the title "MACULAR DEGENERATION" and a brief description of the condition.

Exercise your way to healthy eyes

Staying active keeps our minds and bodies in shape, but it can also be the key to healthier eyes. See how.

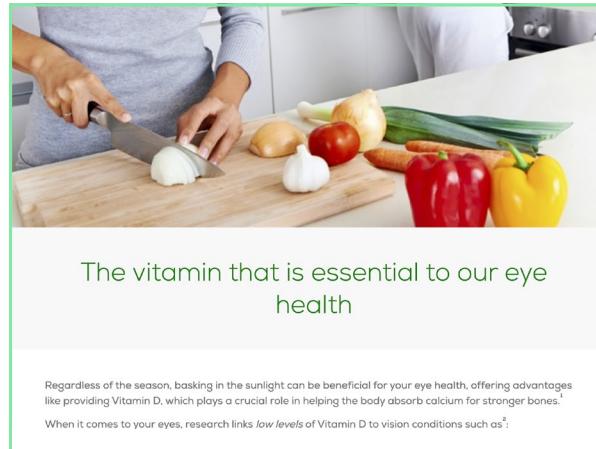

May

Healthy Vision Month

A look at your overall health

You have your annual physicals. You see your dentist regularly. You've got this healthcare thing down. But is seeing your eye doctor on that list? It should be.

The vitamin that is essential to our eye health

Regardless of the season, basking in the sunlight can be beneficial for your eye health, offering advantages like providing Vitamin D, which plays a crucial role in helping the body absorb calcium for stronger bones.²

When it comes to your eyes, research links *low levels* of Vitamin D to vision conditions such as³:

The vitamin that is essential to our eye health

Vitamin D not only helps build stronger bones, it can also be beneficial to your eye health. Here's some ways to make Vitamin D part of your every day.

How to make sure your child isn't the 1 in 4 with an undetected vision issue

It's hard to imagine that babies can only see what's right beside them. Newborns' central vision is still developing and they're just beginning to focus on nearby shapes and colors.⁴ It's even harder to imagine just how crucial a strong visual system is for a child's overall development, with 80% of learning in the first 12 years coming through the eyes.⁵

How to make sure your child isn't the 1 in 4

Strong visual systems are essential for your child's overall development. Here's how to make sure you're helping them develop and sharpen their vision at every stage.

June

Cataract Awareness Month | Fireworks Eye Safety Month

3 Ps of summer eyewear: Protection, polarization, panache

The name of the eye game any season of the year is protection, but especially in the summer when there's more daylight reflecting off a variety of surfaces – water, windows, hot pavement. That's where polarization comes into play. While UV protection is all about blocking potentially harmful rays, polarization cuts down on glare. Add in a little panache, and you've got a powerful, protective combination that makes a bold

3 Ps of summer eyewear: Protection, polarization, panache

While most sunglasses have some form of sun protection, not all are created equal. We're unpacking the three P's to keep in mind for summer eyewear.

Put your best face forward

Just like your sneaker collection or go-to jewelry, eyewear is an important part of your wardrobe. A style statement that's front and center, eyewear is an accessory where health meets fashion, so it's important you choose a frame that's right for you.

June 27: National Sunglasses Day

Now what you see is what you hear

Discover what makes Nuance Audio an exciting and seamless solution for mild to moderate hearing loss.

November

Diabetic Eye Disease Awareness Month

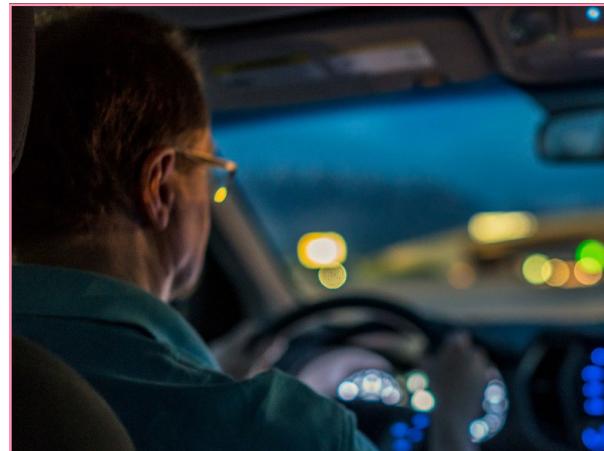

Are you at risk for diabetic retinopathy?

For most of us, our eyesight is not the first thing that comes to mind when we think about diabetes. But actually, diabetes is the leading cause for new cases of blindness among working-age adults.¹

That's because increased blood sugar in diabetic patients can easily damage the tiny blood vessels in the retina, the part of the eye that captures and sends images to the brain. When these vessels are damaged, it can result in blood and fluid leakage in the retina, closure of the blood vessels or formation of new vessels over the retina's surface which can inhibit your vision and cause vision loss.²

Are you at risk for diabetic retinopathy?

Understand how diabetic retinopathy can appear in the eyes and why comprehensive eye exams can be key to managing symptoms.

Read about essential tips and new innovations to make night driving easier and clearer.

Managing thyroid eye disease

Thyroid eye disease, also called Graves' eye disease, results from the effect of hyperthyroidism on the structures of the eyes. Hyperthyroidism occurs when the thyroid gland produces too much of the thyroid hormone. As a result, the body's immune system attacks the eye muscles and tissues in the eye socket, causing swelling, inflammation and limited movement of the eye.¹

There are four risk factors for thyroid disease:¹

Managing thyroid eye disease

Discover the risks and symptoms of thyroid eye disease and how an eye doctor could help.

December

National Safe Toys and Gifts Month

Eye safety and the holidays

It's important to keep your eyes safe and healthy all year long, but the holiday season tends to put us in situations where we might need to be extra careful with our eyesight – it's a precious gift, after all.

5 ways to use your vision benefits before they expire

It's important to stay up to date on your wellness and take full advantage of your annual health benefits. Here are 5 ways you can use your vision benefits before they expire.

How winter weather impacts your eyes and what you can do about it

Don't let colder temps and strong winds slow your eyes down. Dive into winter weather eye problems and ways to fix them.
